6.2 Ensure that existing public/private health equity data collaboratives (e.g., the Gravity Project8) encompass nursing-specific care processes that improve visualization of data on SDOH and associated decision making by nurses.

FUTURE OF NURSING™
Campaign for Action

1. Key Strategic Stakeholders	2. Top 3-5 Actions for 2021	3. Top 3-5 Actions for 2022
Health Care Organizations National Association of Social Workers; Nursing Informatics Specialists **Federal Government** Center for Disease Control and Prevention; Centers for Medicare and Medicaid Services; Health Resources and Services Administration U.S. Department Health Human Services; U.S. Surgeon General **Education** Schools of Nursing **Other** Case workers; Electronic Management Records Vendors; Funders; Gravity Project; Ministries of Health & Public Health Departments; Nurse leaders at the American Red Cross; National Library of Medicine	A. Define nursing-specific care processes. B. Examine data collection areas for public health and Social Determinants of Health (SDOH). C. Evaluate which SDOH components to track. D. Convene nurses with expertise on this area E. Identify who leads these efforts. F. Define who collects these data.	A. Ensure nurse representation among existing data and equity convenings. B. Connect with existing international programs and collaboratives to learn more. C. Work with vendors to ensure data is public and easy to understand. D. Engage companies which have expertise in visualizing data. E. Review and evaluate opportunities for nursing informatics fellowships. F. Review and evaluate existing data visualization efforts.

4. Success Indicators

- More robust data sets which nurses can act upon.
- EMR products are built out and used (usage percentages).
- Better alignment of patient outcomes with interventions.
- Use of these data by nurses and other stakeholders.
- More nurses on the backend of EMR development.
