

6. USING TECHNOLOGY TO INTEGRATE DATA ON SOCIAL DETERMINANTS OF HEALTH INTO NURSING PRACTICE

6.4 Give nurses in clinical settings responsibility and associated resources to innovate and use technology
 (Team 12 defined “Clinical Settings” as all places where nurses provide care)

1. Key Strategic Stakeholders	2. Top 3-5 Actions for 2021	3. Top 3-5 Actions for 2022
<p>Nursing Organizations All</p> <p>Health Care American Hospital Association; Health system C-Suites; Nurses; Public Health decisionmakers</p> <p>Non-Profits Consumer groups; community-based organizations; Funding organizations</p> <p>Federal Government Federally Qualified Health Centers; Funding opportunities from agencies</p> <p>Education Academic institutions (integrated into the curriculum)</p>	<p>A. Getting nurses on key committees that determine which technologies are used/being considered</p> <p>B. Evaluating existing Innovation platforms and determine what is scalable</p> <p>C. Develop a pathway to integrate innovation competencies into nursing curriculum</p> <p>D. Reach out American Association of Colleges of Nursing to consider a session at their upcoming conference to explore the potential for chief information/innovation officers within schools of nursing</p>	<p>A. Nursing payment model changes need to be applied to innovation funding</p> <p>B. Develop a scalable Innovation platform</p> <p>C. Increase the number of partnerships across disciplines within academic institutions</p>

4. Success Indicators

- Patient Outcomes improve as a result of innovations
- Employee retention/engaged workforce
- Get to the level of 10% of nurses participate in innovation platforms (400,000 nurses)
- 50% increase of chief information officer/innovation officers who are nurses
- More nursing schools within academic health centers consider hiring chief information/innovation officers who are nurses
